# Kipad

The Multitouch Innovation

The Kipad model is designed for indoor use only and to be integrated into an IPAD. Could be used as an Information Point of the institution / company where it is installed, Internet access point or for any application that can be developed for the iPad.

It can also be used for public or private institutions to attend the clients where, somehow, a management service / waiting queues is needed, by simply installing a printer for tickets.

Through a glossy widescreen Multi-Touch 9.7-inch you can quickly see the information you are looking for.

All the iPad applications were designed to take advantage of the Multi-Touch display and the advanced capabilities of IPAD.

The glass is scratch proof so, even when exposed to a massive use, will not damage the multi-touch screen.

This model can be manufactured in stainless steel AISI 304 or painted steel (available in all RAL colors) using steel plate of 1,5mm to 2mm.

Kipad can be equipped with an A4 Apple Chip with 1 GHZ, high performance and low power, Wi-Fi (802.11 a / b / g / n), Bluetooth 2.1 + EDR, etc.

## Technical Specifications Kipad Kiosk

Dimensions: H1200 x W350 x D300  
Weight: aprox. 19 Kg.
