Vougue

The materials revolution

The Vougue model was developed for indoors use to work as stand up kiosk.

The new Vougue model results from a combination of the great aesthetic acrylic and stainless steel or lacquered. This model was designed for use indoors.

This model is pratically made in a 20 mm Acrylic giving it an aesthetic and innovative design.

This model is normally equipped with a 17" SXGA touchscreen display (SAW)

The area where the PC will be installed has security locks, general switch and is easily detachable, leaving enough space for the installation and access to a minitower PC.

Besides the acrylic the Vougue Kiosk is manufactured in stainless steel or painted steel (available in all RAL colors) using steel plate of 1,5mm to 2,5mm and can have speakers if the sound is necessary for the case.

The Vougue Model is normally equipped with a Atom CPU with a 160 GB hard drive, 1 Gb Ram Memory, a 128Mb graphic card and a 10/100 mb ethernet, Windows 7 Starter.
